

THE GIFT OF HEALTH FOR FATHER'S DAY

FREE PROSTATE & COLON CANCER SCREENINGS

It might not be the typical gift for Dad, but encouraging your father, husband or son to get screened for prostate and colon cancer can keep him in the game for many Father's Days to come.

And Dads...Think about the many people who love and depend on you. That's why it's important to do everything you can to stay healthy and well!

About one in six men develop prostate cancer—the most common non-skin cancer in males nationwide. However, when the disease is detected early, the cure rate is more than 90 percent.

Colorectal cancer is the third most common cancer in U.S. men, and the third leading cause of male cancer death after lung and prostate. Early detection can reduce the incidence of colon cancer by 40 percent and, by preventing tumor formation, can cut the death rate in half.

FREE PROSTATE & COLON CANCER SCREENINGS

Thursday, June 25, 5:30-7:30 p.m.

*For men 45 years and older who haven't been
previously screened*
